One person in every mineteen of our population returned an income over six hundred dollars, taking the census of 1860 as our basis of calculation, just as they do in Cincinnati. The truth is, we doubt if there is another community in the courties with other cities and towns, that our revenue officers here are over zealous and ambitious in the discharge of their duties. Their large exhibits are very expensive compilments to the bone and sinew of the tax payers. We are led to suppose that the consciences of our people are in a better condition flam anywhere else. They have all read about Anannas and Sapphira who didn't make a full return, and the direafful consequences that ensued to them, and they have also read more modern instances of their short accounts, and either by virtue of the former or the latter reading or something else, have turned in and turned themselves entirely outwards to the gaze of the assessors, who have not failed in a single instance to fully beat the Hamilton county exhibit in the gaze of the assessors, who have not failed in a single instance to fully
